Core ISO19115-2000-2010\_DFO\_floodextent\_v1.docx;

Dear Claudia,

Below you will find a link to the 2000 - 2010 water extent map (shapefile) for the GeoSUR project. It contains all floods that are monitored during 2000-2010 for the LAC area by the Dartmouth Flood Observatory (so mostly by Bob Brakenridge).

[http://csdms.colorado.edu/pub/users/kettner/Claudia/2000-2010\\_DFO\\_floodextent\\_v1.zip](http://csdms.colorado.edu/pub/users/kettner/Claudia/2000-2010_DFO_floodextent_v1.zip)

Could you let me know when you have downloaded the file so I can remove it to keep our server clean?

I think the map should be added to the geoportal for people to download. I do not think this layer should be available in the "MapLayers", but correct me if I'm wrong Santiago.

Dear Miguel, attached also the Core ISO19115 meta-data file. Could you add this to the Geoportal as well?

As of now the following water extent products for the GeoSUR project should be made available by DFO:

2000 - 2010 layer (10 year layer as shapefile)

2011 layer (1year layer as shapefile)

2012 layer (1year layer as shapefile)

2013 layer (1year layer as shapefile)

2014 layer (1year layer as WMS)

current 2week water extent layer (as WMS)

Let me know if more information is needed for this 10year layer.

Hope all is well. Best regards,

Albert.
