

Landsat Science Products

Want to see the Earth's surface more clearly?

Landsat Surface Reflectance removes the haze from the atmosphere.

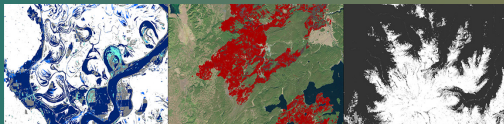

How hot is the Earth's surface?

Landsat Surface Temperature measures the heat radiating from ag and urban areas as well as other landscape surfaces.

Additional Landsat Science Products

Dynamic Surface Water Extent

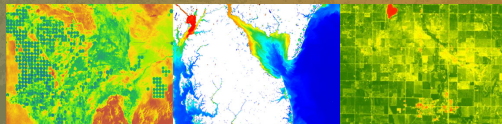

Studies the existence and condition of surface water

Burned Area

Monitors burn classification and burn probability

Fractional Snow Covered Area

Discovers the percentage of a pixel covered by snow

Provisional Actual Evapotranspiration

Tracks water use in agricultural areas, monitors drought and environmental conservation areas

Provisional Aquatic Reflectance

Views sediment and other particulates in inland water bodies

Landsat Spectral Indices

Monitors vegetation, burn ratios, snow measurements and moisture levels
