

LANDSAT PROGRAM IMAGING THE EARTH SINCE 1972

47 YEARS
The Landsat Program is the longest-running Earth-observing satellite mission in history, providing continuous data for over 40 years.

8 LAUNCHES
The Landsat Program has launched 8 satellites, including Landsat 1, 2, 3, 4, 5, 7, 8, and 9.

20 GROUND STATIONS
Landsat data is received from 20 ground stations around the world, ensuring continuous data flow.

8M IMAGES
An average of 1,000 new images are collected every day, providing a wealth of data for research and monitoring.
