

2023 Florida: BICY AIRPLANE D RX FY23

fl2603908117020230215

Latitude: 26° 02' 45.6"
Longitude: -81° 10' 30.0"
Fire Ignition Date: February 15, 2023
Assessment Type: Extended
Pre-Fire Image Date: June 29, 2022 (S2A)
Post-Fire Image Date: July 04, 2023 (S2A)

Acreage of Burn Severity

Burn Severity	Acres
Unburned to Low	2,474
Low	1,636
Moderate	0
High	0
Increased Greenness	28
Non-Processing Area Mask*	215
Total	4,354

This map portrays fire severity for the fire specified in the map title and summarizes proportions of fire severity classes. These data are produced under the National Burn Severity Mapping Project (NBSMP) jointly implemented by the USGS EROS and the NPS. The NBSMP ascertains the locations of fires based upon special requests from NPS staff members. The NBSMP reserves the right to correct, update or modify geospatial inputs to this map without notification.

* Areas in either the pre-fire or post-fire reflectance imagery containing clouds, snow, shadows, smoke, significantly sized water bodies, missing lines of image data, etc.
