

2024 Texas: BTP BIG SANDY RX

tx3064909466720240322

Latitude: 30° 38' 31.2"
 Longitude: -94° 40' 40.8"
 Fire Ignition Date: March 22, 2024
 Assessment Type: Initial
 Pre-Fire Image Date: March 23, 2024 (S2B)
 Post-Fire Image Date: April 05, 2024 (S2B)

Acreage of Burn Severity	
Burn Severity	Acres
Unburned to Low	6,176
Low	1,286
Moderate	685
High	177
Increased Greenness	993
Non-Processing Area Mask*	0
Total	9,316

This map portrays fire severity for the fire specified in the map title and summarizes proportions of fire severity classes. These data are produced under the National Burn Severity Mapping Project (NBSMP) jointly implemented by the USGS EROS and the NPS. The NBSMP ascertains the locations of fires based upon special requests from NPS staff members. The NBSMP reserves the right to correct, update or modify geospatial inputs to this map without notification.

* Areas in either the pre-fire or post-fire reflectance imagery containing clouds, snow, shadows, smoke, significantly sized water bodies, missing lines of image data, etc.
