

2024 Georgia: STAFFORD PLANTATION RX

ga3080508145720240419

Latitude: 30° 48' 18.0"
Longitude: -81° 27' 21.6"
Fire Ignition Date: April 19, 2024
Assessment Type: Initial
Pre-Fire Image Date: April 12, 2024 (S2A)
Post-Fire Image Date: May 02, 2024 (S2A)

This map portrays fire severity for the fire specified in the map title and summarizes proportions of fire severity classes. These data are produced under the National Burn Severity Mapping Project (NBSMP) jointly implemented by the USGS EROS and the NPS. The NBSMP ascertains the locations of fires based upon special requests from NPS staff members. The NBSMP reserves the right to correct, update or modify geospatial inputs to this map without notification.

* Areas in either the pre-fire or post-fire reflectance imagery containing clouds, snow, shadows, smoke, significantly sized water bodies, missing lines of image data, etc.

0 0.1 0.19 Miles

Acreage of Burn Severity

Burn Severity	Acres
Unburned to Low	97
Low	41
Moderate	0
High	0
Increased Greenness	0
Non-Processing Area Mask*	0
Total	138
